Casement Window

A casement window is a window that is attached to its frame by one or more hinges at the side. They are used singly or in pairs within a common frame, in which case they are hinged on the outside.

Casement windows are often held open using a casement stay. The casement windows are also soundproof and dustproof. It can be installed in the Living Room, Kitchen and Balconies.

Tilt and Turn Window

A tilt and turn window can both tilt inwards at the top or open inwards from hinges at the side. This window features an innovative design that allows it to swing outwards like a casement window for full opening or tilt inwards for controlled ventilation and easy cleaning. Its versatility ensures optimal air circulation and maintenance. These windows are used in spaces where ventilation is paramount.

Sliding Window

This Window comprises of two or more sashes that slide horizontally on the outer frame. The sashes move smoothly on the outer frame with the help of nylon rollers, when compared to aluminium and other

traditional sliding windows. Multi-chamber design of the profile reduces the transfer of the heat thus saves energy. Available in various designs - Two Track, Three Track & Two Track with Mosquito Mesh.

Fixed Window

Fixed windows are the types of windows that are provided with a fixed frame and that cannot be opened. Fixed windows can be used to add style and charm to a room without the obstructions or hindrances which prevent natural light from getting in! These windows are best suited for the places with the requirement of ventilation. The fixed windows are soundproof and dust-proof as well.

Dev uPVC Windows are Soundproof, Dustproof & Easy to Operate

Our Door Products

Bi Fold Door

A Bi-folding door is a type of door which opens by folding back in sections or so-called panels. The Bi-fold doors possess 2 to 7 panels which can be folded and stacked upon each other in a corner giving

away a huge space for other usages. The presence of 4 wheels and 2 nylon guides enables smooth operation of these bi-fold doors. These doors are 10 times more secure than the regular doors.

Casement Doors

Casement doors are doors that can be opened inwards/outwards with the help of hinges fixed on a frame. Our uPVC casement door come with an updated modern twist and are built with top quality casement hardware in order to make them easy to operate and last longer. It can even be configured for opening inside and outside.

French Door

French doors can be used as both doors marking the entrance of a home or as interior doors separating two spaces! The French doors are quite simple in design but with a hint of ethnicity and class. The French doors give a maximum opening, hence allows ample of

natural light and fresh air to enter the house creating a soothing and calming atmosphere. The French doors are known for their special feature of acoustic insulation, soundproofing and dust resistance.

Sliding Door

A sliding door is the one that can be opened horizontally with the sliding option that is usually parallel to a wall. Sliding doors can be either mounted on top of a concealed track below or can be hung from a concealed track above. The sliding doors give maximum opening and more space on the inside. The sliding doors possess up to 6 movable elements and can be organized as per the individual house requirements. The usage of nylon rollers enables smooth and effortless sliding.
